PROFESSIONAL SUMMARY

Frontend Engineer with 3.5+ years of experience building real-time, high-scale web applications using React and Next.js. Experienced in owning frontend architecture for security-critical, multi-tenant systems and performance-sensitive platforms used across enterprise and government deployments.

TECHNICAL STRENGTHS

Frontend	React, Next.js, SvelteKit, Astro, TypeScript, Tailwind CSS, Redux, Apollo Client
Backend & Data	Node.js, Express, GraphQL, REST APIs, PostgreSQL, MongoDB, WebRTC, Pusher
Testing & AI Tools	Jest, Playwright, Claude Code, Cursor

EXPERIENCE

EZ Labs | Software Developer Feb 2026 - Present

Workspace: Enterprise workflow platform serving 10K+ daily users including McKinsey, managing freelancer and ops-team workflows.

- Owned end-to-end frontend delivery across multiple enterprise modules, translating product requirements into scalable, production-ready solutions in collaboration with Product, QA, and Backend teams.
- Implemented permission-aware workflows, configurable architectures, and third-party integrations while extending feature scope to improve long-term maintainability.
- Resolved complex engineering problems and legacy module issues through root-cause analysis, reducing technical debt and improving platform stability.
- Documented six core frontend modules and standardized implementation patterns for AI-assisted development, while mentoring junior developers through PR reviews and architectural guidance.

LENS Corporation | Software Development Engineer Sept 2024 - Dec 2025

Smart Video Intercom & Access Control System: Platform serving 300K+ users across 1,700+ devices with real-time visitor management and access automation.

- Migrated legacy frontend to **Next.js**, introducing modular architecture and **78% test coverage** to support scalable multi-tenant deployments.
- Redesigned visitor workflows with geospatial mapping and real-time status updates, reducing user-reported issues by **47%**.
- Rebuilt intercom-to-mobile calling flow, resolving device unlocking failures and third-party API synchronization issues causing frequent support escalations.
- Led zero-downtime migration of **300K+ users** and fixed XSS, CSRF, and authentication vulnerabilities, contributing to **STQC certification** readiness.

AI-based Real-Time Video Monitoring Platform: Government-deployed video monitoring system with AI-driven threat detection.

- Built a real-time video management frontend using **Svelte** and **Astro**, supporting **100 concurrent camera streams** with sub-100ms latency across multiple deployments.
- Optimized event processing by migrating from PocketBase to **PostgreSQL**, reducing alert API latency from **43s to 3s** under high-throughput conditions.
- Integrated WebRTC streaming with dynamic frame-rate control and auto-reconnect logic for reliable multi-vendor CCTV feeds.

Anubudh EdTech, Pune | Frontend Developer Dec 2022 - Apr 2024

- Designed and maintained a **40-component React UI library** adopted across 5+ client projects by 8 developers, reducing feature delivery time by **18%**.
- Led frontend performance optimization using code splitting and lazy loading, reducing bundle size by **60%** and improving time-to-interactive from **6s to 2.5s**.

EDUCATION

Swami Vivekanand Institute of Technology
Bachelor of Technology in Mechanical Engineering

Graduated 2021
